

Correspondence Course Order Form

Release Date - August 2016; Expiration Date – August 2018

Course 1

Onychomycosis and Tinea Pedis

W. Steven Pray, Ph.D., D.Ph.

Course 2

Review of New Drugs

Krista Brooks, R.Ph., Pharm.D.

Each program is approved for 4.0 hours each by the Oklahoma State Board of Pharmacy.

You will be mailed the course booklet(s), answer sheet(s) and return envelope(s). After you have read the course and answered the thirty questions, you will need to send the completed answer sheet in the return envelope or attach via email. When your answer sheet is received, it will be processed and returned to you with a Statement of Credit. Successful completion of the course requires a score of 70 percent or better.

Course 1 - Onychomycosis and Tinea Pedis (\$60)

Course 2 - Review of New Drugs (\$60)

A Review of New Drugs

Krista G. Brooks, R.Ph., Pharm.D.
Associate Professor of Pharmacy Practice
College of Pharmacy, Southwestern Oklahoma State University
Weatherford, Oklahoma

Goal: The goal of this course is to provide pharmacists with a concise review of recently approved prescription drugs with an emphasis on practice-oriented information regarding new molecular entities.

Learning Objectives: For each recently approved prescription drug product, the pharmacist should be able to:

1. identify the classification
2. discuss the approved indication and place in therapy
3. describe the mechanism of action
4. describe adverse effects, warnings, and precautions
5. recognize clinically relevant drug interactions
6. discuss important patient information
7. identify the available dosage form(s) and recognize an appropriate dosage regimen.

Outline:

- | | | | |
|------|---|-------|---------------------------------|

Onychomycosis and Tinea Pedis: Background and Treatment Options

W. Steven Pray, Ph.D., D.Ph.
Bernhardt Professor, Nonprescription Products and Devices
College of Pharmacy, Southwestern Oklahoma State University
Weatherford, Oklahoma

The goal of this lesson is to discuss the anatomy and physiology of the nails, as well as the prevalence, etiology, differential diagnosis, manifestations, subcategories, epidemiology, prevention, complications, and pharmacologic management of onychomycosis and tinea pedis. Upon completion of this course, the pharmacist will, with 70% or greater accuracy, be able to:

1. Describe the anatomy and physiology of the nails, and identify the prevalence, etiology, differential diagnosis, manifestations, subcategories, epidemiology, prevention, and potential complications of onychomycosis and tinea pedis.
2. Recognize relative advantages and disadvantages among potential prescription treatments for onychomycosis and nonprescription treatments for tinea pedis and identify which are most appropriate in specific patients.
3. Provide appropriate counseling information for prescription and nonprescription antifungal products.
4. Address common misunderstandings about onychomycosis.

Outline

- | | | | |
|-----|--|------|---|
| I. | Introduction | J. | Unproven Treatments for Onychomycosis |
| II. | Onychomycosis | K. | Educating Patients by Correcting Misconceptions Surrounding Onychomycosis |
